Medication Renewal/Review encounter performed at Health Services.

Administrative Notes:

ADMINISTRATIVE NOTE 1 Provider: Lepiane, R. MD

Patient has persistent neck and right upper back /right trapezius area pains now He was lifting a heavy box on 09/06/12 and afterward developed neck and upper back pains Patient has a history of chronic neck pains > 15 years He has been on gabapentin 1100 mg TID and well as Motrin for pain He had a previous MRI of his C-spine in March 2010 showed mild to moderate cervical spondylosis with multilevel degenerative disc disease He also had suspected osteophyte disc complexes at C5-C6 and C6-C7 extending toward the right and associated with neural foraminal encroachment at both of these level However his EMG/NSC study here in Jan 2012 was completely normal There was no evidence of any cervical nerve root radiculopathy or neuropathy He underwent a cortisone injection of his right trapezius area on 10/01/12 with a good result but his pain are now back again he was asking about another cortisone injection I would prefer to await until after the holidays for this repeat injection if possible
Patient need a refill on his Motrin
